Office Action Summary	Application No. 10/692,419	Applicant(s) CURRANS ET AL.	
	Examiner John M. Winter	Art Unit 3621	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Acknowledgements

The Applicant's application filed on October 22, 2003 is acknowledged, Claims 15, 20, 22 and 24 have been examined .

This application is a divisional application of U.S. application no. 09/652,460 (Parent Application) . See MPEP §201.06. In accordance with MPEP §609 A. 2 and MPEP §2001.06(b) (last paragraph), the Examiner has reviewed and considered the prior art cited in the Parent Application. Also in accordance with MPEP §2001.06(b) (last paragraph), all documents cited or considered 'of record' in the Parent Application are now considered cited or 'of record' in this application. Additionally, Applicant(s) are reminded that a listing of the information cited or 'of record' in the Parent Application need not be resubmitted in this application unless Applicants desire the information to be printed on a patent issuing from this application. See MPEP §609 A. 2. Finally, Applicants are reminded that the prosecution history of the Parent Application is relevant in this application. See *e.g., Microsoft Corp. v. Multi-Tech Sys., Inc.*, 357 F.3d 1340, 1350, 69 USPQ2d 1815, 1823 (Fed. Cir. 2004) (holding that statements made in prosecution of one patent are relevant to the scope of all sibling patents).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person

Art Unit: 3621

having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 15, 20, 22 and 24 are rejected under 35 U.S.C. 103(a) as being unpatentable over
Briscoe. (US Patent 6,341,273) in view of Berstis et al. (US Patent 6,282,653)

As per claim 20

Briscoe ('273) discloses a method of exchanging payments, comprising the steps of:

purchasing a consumable item; (Column 6, lines 49-58)

creating a digital cash account for the consumable item;(Column 5, lines 12-31)

expending a portion of the consumable item wherein the use of the consumable item
incurs a debit charge; (Column 6, lines 8-46)

reducing the amount of the digital cash account by the amount of the debit charge
incurred.(Column 6, lines 8-46)

Briscoe ('273) does not explicitly disclose

acquiring royalty based content that indicates an owner of the content and the amount of debit
charge for using the content; updating a digital cash account for the owner of the content by the
amount reduced from the digital cash account for the consumable item. Berstis et al. ('653)
discloses acquiring royalty based content that indicates an owner of the content and the amount
of debit charge for using the content; updating a digital cash account for the owner of the content
by the amount reduced from the digital cash account for the consumable item. (Abstract) It
would be obvious to one having ordinary skill in the art at the time the invention was made to
combine the Briscoe ('273) method with the Berstis et al. ('653) method in order to recoup the

expense of product development.

Claims 15 are in parallel with claim 20 and are rejected for at least the same reasons.

As per claim 22

Briscoe ('273) discloses an apparatus including a consumable item using the method of claim 15 to exchange payments. (Abstract)

Claims 24 is in parallel with claim 22 and are rejected for at least the same reasons.

Conclusion

Examiners note: Examiner has cited particular columns and line numbers in the references as applied to the claims above for the convenience of the applicant. Although the specified citations are representative of the teachings of the art and are applied to the specific limitations within the individual claim, other passages and figures may apply as well. It is respectfully requested from the applicant in preparing responses, to fully consider the references in entirety as potentially teaching all or part of the claimed invention, as well as the context of the passage as taught by the prior art or disclosed by the examiner.

Also in accordance with *In re Lee*, 277 F.3d 1338, 1344-45, 61 USPQ2d 1430, 1434-35 (Fed. Cir. 2002), the Examiner finds that Nathan J. Muller's Desktop Encyclopedia of the Internet, ("Desktop Encyclopedia") is additional evidence of what is basic knowledge or common sense to one of ordinary skill in this art. Muller's Desktop Encyclopedia is a practical reference that clearly explains Internet services, applications, protocols, access methods, development tools, administration and management, standards, and regulations. Because of the

Art Unit: 3621

reference's basic content (which is self-evident upon examination of the reference) and after further review of the entire record including the prior art now of record in conjunction with the factors as discussed in MPEP §2141.03 (where practical), the Examiner finds that the Desktop Encyclopedia is primarily directed towards those of low skill in this art. Because the reference is directed towards those of low skill in this art, the Examiner finds that one of ordinary skill in this art must—at the very least—be aware of and understand the knowledge and information contained within the Desktop Encyclopedia.
